 मध्यावकाशे चोच्छूनं श्वित्रं तत्साध्यमुच्यते ॥

C.S.Ci. 7/173-176

Śvitra is caused by vitiation of all the three *Doṣās* but sometimes it may manifest by either single *Doṣa* or two *Doṣa*.

It is classified into 3 subtypes namely *Dāruṇa*, *Cāruṇa* and *Kilāsa*. Depending on the location it manifest symptoms i.e. patches are reddish, coppery and white in colour, if the morbidity is located in *Rakta*, *Māmsa* and *Meda* respectively. Subsequent are more severe.

साध्यासाध्यता (Sādhyāsādhyatā)

If the patches are mutually matted together

having multiple lesions surrounded by red hairs with chronic duration are said to be incurable.

If the patches are surrounded by non reddish hairs having thin and white lesions with recent onset along with elevated margins between two patches are said to be curable. C.S.Ci. 7.175-176.

MCQs

- Features of *Sadhya* (Curable) *Svitra*
 - Krishnaroma*, *Asamsrishtam* & *Atibahala*
 - Arunaroma*, *Asamsrishtam* & *bahala*
 - Pitaroma*, *samsrishtam* & *Abahala*
 - Asuklaroma*, *Asamsrishtam* & *Abahala*
- Roma vidwamsi* is the feature of which type of *Svitra*
 - Vatika*
 - Paittika*
 - Kaphaja*
 - Tridoshaja*
- Kilasa* is the synonym of
 - Svitra*
 - Kusta*
 - Vatarakta*
 - Arsas*

Answer

1.	d	2.	b	3.	a
----	---	----	---	----	---
